EDUCATION

Bachelor's Degree
Computer Science
Universidade Estácio de Sá
Aug 2025 – Present

Postgraduate
BIM Management and Coordination
Instituto de Pós-Graduação - IPOG
Jul 2022 – Jul 2023

Bachelor's Degree
Architecture and Urbanism
Universidade Augusto Motta - UNISUAM
Aug 2016 – Jul 2021

Technical Degree
Building Construction
Universidade Estácio de Sá
Apr 2014 – Oct 2015

CERTIFICATIONS

buildingSMART Professional Certification - Foundation
buildingSMART International
Dec 2025

KEY SKILLS

ISO 19650
BIM 360, ACC
Autodesk AEC Collection (Navisworks, Revit, Civil 3D...)
Dynamo

PROGRAMMING SKILLS

Python, JavaScript, C#, C++
Web development: HTML, CSS

LANGUAGES

English: Intermediate (Professional working progression)

INTERESTS

Aviation (Private Pilot Student)
Programming & Digital design
Gaming
Music (Bassman)
Photography

SUMMARY

I bring hands-on experience implementing BIM methodology in large-scale, high-complexity defense infrastructure projects. At Odebrecht, I supported the BIM strategy for the construction of the shipyard and naval base of the Brazilian Navy's Nuclear Submarine Development Program — PROSUB, one of the country's most advanced engineering initiatives.

Driven by innovation, I am expanding my technical background by pursuing a Computer Science degree. I combine BIM coordination and data management experience with software development and computational logic, aiming to build smart, scalable, and data-oriented solutions for the AEC industry.

WORK EXPERIENCE

BIM Specialist / Architect
Odebrecht
Nov 2023 – Present

I work as a BIM Specialist and Architect leading BIM implementation across large-scale, high-security federal projects, including the Brazilian Navy's Nuclear Submarine Development Program (PROSUB). My role involves integrating BIM processes, optimizing data workflows, developing automation scripts, and coordinating international multidisciplinary teams to enhance information accuracy, operational performance, and digital transformation within complex AEC environments.

- Led BIM implementation for high-security federal infrastructure, supporting a multi-billion defense program (PROSUB).
- Coordinated multidisciplinary teams across countries, improving alignment and model quality for complex AEC workflows.
- Built custom automation routines and applications to manage large datasets that reduced manual tasks by 25% - 40% and increased data accuracy.
- Implemented standardized BIM workflows following ISO 19650, improving information reliability across disciplines.

BIM Analyst / Architect
Elecnor do Brasil
Aug 2023 – Nov 2023

Served as BIM Analyst supporting the implementation of BIM methodologies for civil and electromechanical teams in substation engineering projects. Responsible for training and upskilling multidisciplinary teams, improving BIM maturity, and optimizing documentation and information flow to increase productivity and reduce rework.

- Reduced rework through structured BIM processes, improving documentation reliability and flow of information.
- Improved operational efficiency with measurable productivity gains derived from BIM methodology adoption.
- Trained multidisciplinary teams, accelerating BIM maturity and enhancing productivity through standardized modeling and information-management practices.

BIM Modeler / Architect
MARCA Projetos e Consultoria
Aug 2021 – Aug 2023

Worked as BIM Modeler and Architect in industrial and pharmaceutical projects, with strong involvement in modeling, detailing for fabrication and assembly, parametric family creation, quantitative data management, and coordination across disciplines. Also developed Dynamo automation routines to streamline repetitive tasks and optimize workflow performance.

- Developed BIM models supporting conceptual, detailed, and executive design stages for industrial and pharmaceutical facilities.
- Created parametric families and managed quantitative datasets for coordinated multidisciplinary delivery.
- Built Dynamo scripts to automate repetitive tasks, improving productivity and reducing errors in complex data workflows.
- Strengthened integration between architectural, MEP, and structural teams through coordinated BIM workflows.

Architecture Intern
MARCA Projetos e Consultoria | Jul 2019 – Aug 2021

Supported the development of industrial and pharmaceutical projects, with experience in BIM and CAD modeling. Contributed to industrial site surveys and the development of as-built documentation. Skilled in Revit family parametrization and quantitative schedule management, with solid experience in BIM documentation.
